- E-blocks compatible
- Low cost
- 2 lines,16 characters per line
- Flowcode macros for driving this device are available

This 2 line 16 character alphanumeric LCD display uses 5 lines of the E-blocks to allow the display of numbers and characters on the display

This device is fully supported from within Flowcode which allows those with no programming experience to design complex electronic systems.

A technical datasheet which explains how this device is programmed is available with each purchase.

1   E-blocks connector
2   Power connector
3   Patch system
4   Connection selection blocks
5   LCD display
6   Contrast control
